

MARY'S FLOWER SUPERHEAD

"Wealth" | Press release

Mary's flower Superhead, almost six years after their last release, come back with **Wealth**. A six-year period during which **M.f.S.** were not idle but were constantly experimenting with their sound at *Polytropa studio* in Thessaloniki, the place where they were born and grew up. Having rejected much of the material they recorded during this time, they decided to write an album based on their older music listenings. These older music influences joined them 15 years ago and gave them the lead to play music together. It's an energy-packed album that they will enjoy performing it live and will justify the characterization of "a power trio group" that has been following them since their first concert in September 2003. After "*Everything Descends*", which is a sample of their previous experiments with synths and psychedelic sound, there are nine other tracks in which M.F.S. show the richness of simplicity and the rawness of the sound, expressing at the same time the aspects of fragility and introversion through words. Remaining once more honest towards their audience, **Mary's flower Superhead** presents us with "**Wealth**".
